## Opportunity Is Possessed of a Forelock But Is Bald Behind

There have been countless fortunes made by men who just had the courage and a few dollars to invest! Look about you! you, your-  
self, know of at least one great industry that has made many poor men rich. A good investment in a legitimate manufacturing enterprise has  
been the foundation of a number of the greatest fortunes of the age. You are not different from these men, if you but have the courage to  
do that which your own mind dictates you should.

We do not desire to appear insistent, but we are sure that those who do not buy this stock now at par will inevitably pay more. You are  
going to want to be a stockholder in this great Fort Worth manufacturing enterprise.

It is now but a question of a month or so until the factory building will be under construction. This will mean that Fort Worth is tak-  
ing its first great step toward the ultimate goal—the greatest city of the Southwest. Not alone in oil and refining, but in manufacturing.  
Here is a product that will be sold to the four corners of the Globe. A shoe that is fully protected by patents that are owned by this company  
and their stockholders.

## Every Stockholder Will Share in All Profits

Even though these shoes should be manufactured by other factories than our Fort Worth one, every stockholder in the Tynes Shoe Com-  
pany would receive their shares of the profits. It is the purpose of this organization to build factories in other localities—for here is a shoe  
that will have a worldwide sale and we are nearly sure that the factory here will not be able to handle the business that will result from the  
national advertising campaign that will be conducted. We believe Tynes Shoes will be one of the great factors that will make the name of  
Fort Worth heard to the four corners of the Globe.

## The Demand Is Worldwide

There never has been a business in which there was the demand that there is in the Shoe business! Every man, woman and child in the  
land wears shoes; there are countless thousands that have been suffering from foot ailment for years. Tynes Shoes come to the call of every  
comfort seeker in shoes.

It is not hard to imagine the wonderful profits that will be made by the stockholders in a Shoe Factory without competition. This shoe  
is the only one of its kind in the world—the only one that affords perfect ventilation for the foot, with all the protection of leather—wearing  
qualities just as great and every bit—if not more—stylish, and 35 per cent cheaper.

## Get Out of the Rut

Get out of the rut! Go "Over the Top," invest your money to make money and be sure that your investment will be in an organization  
that is to have a part in the great future of Fort Worth and Texas. Tynes Shoe Factory will surely be this. Idle dollars are like idle men,  
there is but one thing they will do and that is to get into trouble. Don't let your money trouble you—invest it—make it work 365 days in the  
year. Your money has no more right to be idle than you yourself. Ask the advice of the great Captains of Industry how they made their  
money and how they are making more. They will answer with one accord: "Invest your money in the Industrials of your community; they  
will grow as your city grows; they will make the foundations of a fortune." Many a man that has been called lucky has done nothing more  
than acted on this advice.

## A Home Market of 100,000,000

There are 100,000,000 pairs of feet in the United States, alone, waiting for Tynes Kool Komfort Shoes—there is a legitimate profit in  
every pair. Do you want to share these profits? You do if you are interested in your future and the future and the future of the great  
Southwest. Just stop and think, that we would but have to sell 2 per cent of the United States Shoe market to pay 800 per cent on our small  
capitalization.

There are numbers of people all over the great Southwest who are sending in their orders for these shares. Some of them have called  
at our offices—they are all of the opinion that here will be one of the greatest profit makers that has ever been offered the public. They are  
buying this stock because their better judgment dictates that they should. It is not a matter of following the crowd; it is much more—a matter  
of following your good judgment. Invest your money in this company just the same as you would select a bank in which to deposit it. There  
will be a great difference in the earning power and you can feel just as safe. Your money will go to build permanent factory buildings, the  
purchasing of materials. All this work will be on top of the ground, where you can see it. This factory will be erected just as quickly as pos-  
sible. No time will be lost in the completion of this first unit. Now it is up to you. We are soliciting your financial assistance; we need help,  
but we are offering great profits in return.

There is not a great deal of this stock for sale, just a small issue at \$1.00 par, per share, for public subscription. We believe that  
you will thank us if we urge that you mail your check for all this stock that you can possibly carry.
